

ENVIRONMENTAL CHECKLIST

A. BACKGROUND

1. Name of proposed project, if applicable:

AOCs – 050, 051 & 052 Soil Removal
Boeing Renton Corrective Action Agreed Order

2. Name of applicant:

The Boeing Company
P.O. Box 3707, M/S 92-10
Seattle, WA 98124-2207

3. Address and phone number of applicant and contact person:

Raymond Power (425) 234-7744
Airplane Programs Environmental Affairs
The Boeing Company
P.O. Box 3707, M/S 92-10
Seattle, WA 98124-2207

4. Date checklist prepared:

September 28, 2004

5. Agency requesting checklist:

Washington Department of Ecology
Northwest Regional Office – Toxics Cleanup Program

6. Proposed timing or schedule (including phasing, if applicable):

Start March 1, 2005. This petroleum containing soil removal is being conducted in conjunction with the site redevelopment and sale.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

No.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

Remedial Investigation Report. The Soil Removal Work Plan has been submitted to WDOE for approval.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

Yes. The City of Renton is issuing a demolition permit which is a project separate from this one.

10. List any government approvals or permits that will be needed for your proposal, if known.

Federal:

None known at this time

State of Washington:

SEPA DNS from WDOE for Contaminated Soil Removal

Stormwater Construction Permit

King County:

None

City of Renton/Local:

Demolition permit

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

Removal of petroleum contaminated soil to be conducted under WDOE supervision, approval and in accordance with the Boeing Renton Corrective Action Agreed Order. A work plan has been submitted to WDOE for review and approval. This removal will occur in conjunction with the site redevelopment and sale. The excavation is anticipated to measure approximately twenty feet wide by sixty feet long and five feet deep (to the water table). The removed soil will be characterized and disposed according to applicable regulations.

The backfill will consist of clean fill compacted as required per specifications.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

This area is located near the Northwest corner of the intersection of N 8th Street and Park Avenue North. Figure attached.

B. ENVIRONMENTAL ELEMENTS

1. Earth

a. General description of the site (circle one): Flat, rolling, hilly steep slopes, mountainous, other

Flat

b. What is the steepest slope on the site (approximate percent slope)?

2%

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any prime farmland.

Sandy silt loam

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No

e. Describe the purpose, type, and approximate quantities of any filling or grading proposed. Indicate source of fill.

Approximately two hundred cubic yards of soil will be removed and replaced with clean structural fill from a commercial source.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

This project will not result in any impervious surface.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

BMPs will be implemented per the site Stormwater Pollution Prevention Plan.

2. Air

a. What types of emissions to the air would result from the proposal (i.e., dust, automobile, odors, industrial wood smoke) during construction and when the project is completed? If any, generally describe and give approximate quantities if known.

None anticipated. As with all excavation projects, appropriate dust control measures will be used.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

Mitigation measures will be implemented as required to meet or exceed all applicable standards as required by the Puget Sound Clean Air Agency and the Department of Ecology. Additional potential mitigation measures to reduce emissions include ensuring that machines and equipment used during excavation are well maintained.

3. Water

a. Surface:

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

No.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

No.

b. Ground:

1) Will ground water be withdrawn, or will water be discharged to ground water? Give general description, purpose, and approximate quantities if known.

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ;agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None

c. Water runoff (including storm-water):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

Runoff not anticipated from project area.

2) Could waste materials enter ground or surface waters? If so, generally describe.

No

d. Proposed measures to reduce or control surface, ground, and runoff water impacts, if any:

BMPs contained in the site SWPPP.

4. Plants

- a. Check or circle types of vegetation found on the site:**
deciduous tree: alder, maple, aspen, other
evergreen tree: fir, cedar, pine, other
shrubs, grass, pasture, crop or grain,

**wet soil plants: cattail, buttercup, bullrush, skunk
cabbage, other water plants: water lily, eelgrass, milfoil
other types of vegetation**

None

b. What kind and amount of vegetation will be removed or altered?

None.

c. List threatened or endangered species known to be on or near the site.

None

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

N/A

5. Animals

a. Circle any birds and animals which have been observed on or near the site or are known to be on or near the site:

Birds and animals that have been observed on or near the site are listed below:

birds:	seagulls, crows
mammals:	none observed

b. List any threatened or endangered species known to be on or near the site.

None.

c. Is the site part of a migration route? If so, explain.

Pacific Flyway

d. Proposed measures to preserve or enhance wildlife, if any:

Utilize temporary erosion; long term storm water and hazardous materials control systems and best management practices to prevent contaminated discharges.

6. Energy and natural resources

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

N/A

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. Environmental Health

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste that could occur as a result of this proposal? If so, describe.

TPH present in the soil to be removed. A Health and Safety Plan will be developed and followed during the project to mitigate potential hazards. The excavated material will be characterized and disposed per applicable regulations.

1) Describe special emergency services that might be required.

No special emergency services are anticipated. The hazardous materials involved have been identified, commonly managed and are reasonably expected to be within the capability of existing emergency service operations.

2) Proposed measures to reduce or control environmental health hazards, if any:

A Health and Safety Plan will be developed and followed during the project to mitigate these hazards.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

Temporary noise impacts during construction are anticipated. Construction projects of this type typically produce noise levels that range from 68 to 98 dba at 50 feet from the specific equipment.

Construction will take place, typically, from dawn to dusk for about five working days. There will be no additional impacts from this project due to this work being conducted at the same time as the building demolition.

3) *Proposed measures to reduce or control noise impacts, if any:*

None

8. Land and shoreline use

a. *What is the current use of the site and adjacent properties?*

This specific location is being redeveloped for mixed uses. To the West and North, the site is fully developed as an aircraft manufacturing and final assembly facility. To the East is retail and commercial uses. To the South is manufacturing and office uses.

b. *Has the site been used for agriculture? If so, describe.*

No

c. *Describe any structures on the site.*

When this soil removal occurs, there will be no structure at this location.

d. *Will any structures be demolished? If so, what?*

No. The demolition of the structures will occur as a separate project to support site redevelopment and sale.

e. *What is the current zoning classification of the site?*

The current City of Renton zoning designation is Urban Center North 1 (UCN-1).

f. *What is the current comprehensive plan designation of the site?*

Urban Center North (UCN)

g. *If applicable, what is the current shoreline master program designation of the site?*

N/A

h. *Has any part of the site been classified as an "environmentally sensitive" area? If so, specify.*

No

i. Approximately how many people would reside or work in the completed project?

None

j. Approximately how many people would the completed project displace?

None

k. Proposed measures to avoid or reduce displacement impacts, if any:

Not Applicable

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Compliance with city code.

9. Housing

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

None

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None

c. Proposed measures to reduce or control housing impacts, if any:

None

10. Aesthetics

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A

b. What views in the immediate vicinity would be altered or obstructed?

None

c. Proposed measures to reduce or control aesthetic impacts, if any:

None

11. Light and glare

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

N/A

b. Could light or glare from the finished project be a safety hazard or interfere with views?

N/A

c. What existing off-site sources of light or glare may affect your proposal?

None

d. Proposed measures to reduce or control light and glare impacts, if any:

None

12. Recreation

a. What designated and informal recreational opportunities are in the immediate vicinity?

None.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None

13. Historic and Cultural Preservation

a. Are there any places or objects listed on, or proposed for, national, state, or local preservation registers known to be on or next to the site? If so, generally describe.

No

b. Generally describe any landmarks or evidence of historic, archaeological, scientific, or cultural importance known to be on or next to the site.

None have been identified on the project site.

c. Proposed measures to reduce or control impacts, if any:

Although previous excavation has disclosed no indications of archaeological significance, if artifacts are uncovered, work in that area will be halted pending notification and response from appropriate agencies.

14. Transportation

a. Identify public streets and highways serving the site, and describe proposed access to the existing street system. Show on site plans, if any.

North Park Avenue is to the East. Figure attached.

b. Is site currently served by public transit? If not, what is the approximate distance to the nearest transit stop?

Yes.

c. How many parking spaces would the completed project have? How many would the project eliminate?

N/A

d. Will the proposal require any new roads or streets, or improvements to existing roads or streets, not including driveways? If so, generally describe (indicate whether public or private).

No

e. Will the project use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No

f. How many vehicular trips per day would be generated by the completed project? If known, indicate when peak volumes would occur.

N/A

g. Proposed measures to reduce or control transportation impacts, if any:

None

15. Public Services

a. Would the project result in an increased need for public services (for example: fire protection, police protection, health care, schools, other)? If so, generally describe.

None anticipated.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None

16. Utilities

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other.

Electricity, natural gas, domestic water, refuse service, telephone, sanitary sewer and storm sewerage are currently available.

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None

C. SIGNATURE

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.
